

TECH-SPRAY® LIQUIBOR

Boron (B)..... 2.5%

*Boron derived from boric acid and sodium borate.***PRODUCT DESCRIPTION**

TECH-SPRAY LIQUIBOR is a liquid foliar nutrient supplying Boron in a water-soluble form which is readily absorbed by foliage to give a rapid plant response. It is designed for use with TECH-FLO products but may also be applied by itself or in combination with other TECH-SPRAY formulations. TECH-SPRAY LIQUIBOR is neutral in pH.

GENERAL USES

TECH-SPRAY LIQUIBOR should be used only on crops and in areas where **Boron** is needed (see **WARNING** over). It is recommended for use wherever Boron levels need to be increased or there is concern for maintaining optimum levels of Boron within the plant. Boron is frequently applied along with Calcium on crops where Calcium-related disorders are common such as apples, lettuce, tomatoes, celery, etc. Since TECH-SPRAY LIQUIBOR supplies only Boron, it is more suitable for this use than combination formulations which generally contain Nitrogen. A major demand for Boron occurs early in the bloom cycle. For this reason, a pre-bloom or early season application is recommended, but TECH-SPRAY LIQUIBOR may be applied at any time during the growing season to provide a rapid uptake. Suggested rates are 1 to 2 quarts per acre per application. When Calcium is desired, it should be used with TECH-FLO ALPHA, CALCIUM, or GAMMA.

FOR SPECIFIC CROP RECOMMENDATIONS INCLUDING MATERIALS, RATES, AND TIMING, PLEASE READ THE PRODUCT LABELS AND CONSULT A NUTRI-TECH REPRESENTATIVE.

APPLICATION METHODS

TECH-SPRAY LIQUIBOR mixes readily in water and may be applied by any type of spray equipment. It is suitable for aerial application by either fixed wing or helicopter and by dilute and concentrate ground rigs.

COMPATIBILITY

TECH-SPRAY LIQUIBOR is compatible with many commonly used pesticides, so it may be added to crop protection sprays when the timing of application coincides. It may be combined with TECH-FLO products and with other TECH-SPRAY formulations when additional nutrients are needed.

PLEASE CONSULT A NUTRI-TECH REPRESENTATIVE FOR DETAILED COMPATIBILITY INFORMATION.

CAUTIONS

HANDLING: Harmful if swallowed. May cause skin irritation. Avoid contact with skin, eyes, cuts, and sores.

STORAGE: Do not store at temperatures below 40°F. Do not expose to temperatures below 32°F.

WARNING

This product contains **BORON** and is to be used only where **BORON** is known to be beneficial and on the crops and at the rates recommended on the label. Any other use may result in serious injury to crops.
