

TECH-FLO® ZETA**ZINC**

Zinc (Zn).....22.0%

*Zinc derived from basic zinc sulfate***PRODUCT DESCRIPTION**

TECH-FLO ZETA is a flowable foliar nutrient consisting of solution-reacted basic zinc sulfate that has been micronized and formulated in a stable aqueous dispersion. The active ingredient is present in the form of finely ground particles that are slightly soluble in water. These particles release nutrients over a prolonged period of time. Because of its extremely fine particle size, TECH-FLO ZETA is effective at lower rates than wettable powder products. It is non-abrasive, mixes readily, and stays well dispersed in the spray tank. Its dried deposits adhere strongly to the leaf, providing excellent weathering characteristics. Since it is a dispersion, TECH-FLO ZETA supplies more nutrients and provides longer feeding than liquid products, and it is non-corrosive.

GENERAL USES

TECH-FLO ZETA is recommended for use on crops where **Zinc** is the primary element of concern. It is useful for correcting Zinc deficiencies and for maintaining or increasing Zinc nutrient levels. It is particularly recommended for dormant or delayed dormant application on deciduous fruit trees and vines. It may be used as a foliage spray on citrus, avocados, deciduous nut trees, and field and row crops. Use as a foliage spray on deciduous fruit trees should be made with caution as certain varieties may be susceptible to foliage injury, especially from applications made during wet weather and under poor drying conditions.

*FOR SPECIFIC CROP RECOMMENDATIONS, INCLUDING MATERIALS, RATES, AND TIMING,
PLEASE READ THE PRODUCT LABELS AND CONSULT A NUTRI-TECH REPRESENTATIVE.*

APPLICATION METHODS AND TIMING

TECH-FLO ZETA may be applied by any type of spray equipment. It is suitable for aerial application by either fixed wing or helicopter, and by dilute and concentrate ground rigs. Pre-bloom or early season applications are generally recommended except for deciduous fruit trees where dormant or delayed dormant application should be made.

COMPATIBILITY

TECH-FLO ZETA is compatible with spray oils and with many commonly used pesticides, so it may be added to crop protection sprays when the timing of application coincides. It may be combined with TECH-SPRAY™ products and with other TECH-FLO formulations when additional nutrients are desired.

CONSULT A NUTRI-TECH REPRESENTATIVE FOR DETAILED COMPATIBILITY INFORMATION.
